Application/Control Number: 10/552,673

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 2

- 2. Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,403,611 to Tomita et al in view of U.S. Patent No. 6,679,314 to Frank. Tomita et al discloses the claimed invention of an ice cream freezing apparatus comprising two flow-through freezers 4 and 13. However, Tomita et al does not disclose the mixing-in arrangement for solid ingredients. Frank teaches a freezer which includes a mixing-in arrangement 12 for solid ingredients. Thus, it would be obvious to provide Tomita et al with a mixing-in arrangement for solid ingredients, in view of Frank, with the predictable result that more variety is produced for the ice cream. The location of the mixing-in arrangement is considered to be a matter of obvious choice to one of ordinary skill in the art. No criticality or unexpected results are seen or have been disclosed for the claimed arrangement of the ingredients being added between the first and second freezers. Furthermore, one of ordinary skill in the ice cream art would have expected the invention of Tomita et al to work equally as well as with the ingredients being added before the first freezer as with the ingredients being added between the first and second freezers.
- 3. Claims 20-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tomita et al in view of Frank as applied to claim 19 above, and further in view of U.S. Patent No. 4,472,059 to Klein et al. Tomita et al as modified above by Frank discloses

Application/Control Number: 10/552,673 Page 3

Art Unit: 3744

the claimed invention except for the details of the scraper arrangement. Klein et al teaches a screw conveyor for a scraping mechanism in which the conveyor screw includes a plurality of screw flights. See especially Figs. 1, 2, and 4. Thus, it would be obvious to provide Tomita et al with a scraping mechanism comprising a conveyor screw which includes a plurality of screw flights, in view of Klein et al, with the predictable result that more thorough scraping is obtained.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William E. Tapolcai whose telephone number is (571) 272-4814. The examiner can normally be reached on Mon. - Thurs., 6:30 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl J. Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
